ASSETS, \$12,000,000.00

The First Thing to be Considered in Life Insurance Companies' Investments is Safety.

THE INVESTMENTS of the WASHINGTON are Bonds and Mortgages (first liens on real estate) and United States and New York State Stocks and Bonds, in compliance with the laws of the State of New York. 83.62 per cent of the WASHINGTON'S assets are invested in loans on Bonds and Mortgages, being the largest of any company. (See Connecticut Insurance Report, 1892, page 386.)

#### The Policies of the WASHINGTON are Easily Defined.

THEY ARE—Non-forfeitable.

THEY ARE—Unrestricted as to residence and travel after two years.

THEY ARE—Inconfestable after two years

THEY ARE—Secured by an Invested Reserve.

THEY ARE—Solidly backed by Bonds and Mortgages, first liens on Real Estate.

THEY ARE—Safer than Railroad Securities.

THEY ARE—Not affected by the Stock Market.

THEY ARE—Better paying investments than U. S. Bonds.

THEY ARE—Less expensive than Assessment Certificates.

THEY ARE—More liberal than the law requires.

THEY ARE—Definite Contracts.

THEY HAVE—Guaranteed cash surrender values for the full reserve.

### INTRODUCTORY

This, the 1892, edition of the Des Moines City Directory marks a new departure in the method of its publication. It brings Des Moines in line with the principal cities of the Union At New York, Chicago, Milwaukee, St Paul, Minneapolis, and al the leading cities east and west, the directory can wass begins May 1st, and the utmost exertions are made to issue the respective volumes at the earliest moment. This method has been adopted here, and now in less than ten weeks from the inception of the work the volume is presented to the citizens, complete. As a product of the bookmaker's art it is a tribute to the pub lishing facilities and possibilities of the city, for it is pre-eminently a home enterprise the compilation, printing and binding all having been done here. Mechanically it will compare favorably with any directory in the Union, it having been printed from entirely new type, procured expressly for its use.

But it must be borne in mind that the prime object of a directory is to direct, to enable those seeking information to surely and readily find it and rely upon its strict accuracy. In this respect we can give the most positive assurance. All the work of which it is the result has been under the auspices of Messrs. R. L. Polk & Co., who are exclusively and more extensively engaged in the compilation of directories, and similar publications, than any concern in this or any other country. No expense or pairs have been spared in making this edition of the Des Moines Directory equal in accuracy and completeness to that of any city in

the Union. It is our desire to meet the full requirements of this growing city, and to that end we have labored most earnestly and conscientiously without regard to expense.

#### Announcement.

We (R. L. Polk & Co) have established here a permanent office, and will place on file for the free use of citizens and strangers directories of all cities and states of the United States, Canada and many European, cities. This library in our midst will prove a valuable acquisition of great convenience to business and professional men.

It is the intention of the company to make Des Moines the headquarters for a considerable publishing business, and to employ from this office quite a force of men. A resident manager will locate here.

We have had the Des Moines office mentioned on the cards and stationery at all our offices throughout the entire country, and these cards and letterheads are widely distributed in the course of the year's business.

Copies of this issue of the Des Moines Directory will be sent to all the offices of the company in the several sections of the Union, and by exchange to all principal cities not only in the United States, but in Canada and Europe.

We have an abiding faith in the future of this city and are here to become identified with its interests, and, so far as in our power lies, to promote them. If our efforts to provide Des Moines with a credit-

\$ : it.

able city directory merit the support of the citizens, we have no doubt that it will be accorded.

#### Population.

It is the custom of directory publishers, to estimate the population of their respective cities from the date of the annual canvass, and these estimates have been found to closely approximate state and government censuses, and are believed by many to be more nearly correct. In common with other citizens, we have looked forward with considerable interest to the result, that would be revealed by the thorough and searching canvass that we know has been made for every name that properly belongs in the Directory. But as the canvass progressed any apprehension that it would fall short of expectations were dispelled. The result is such conclusive evidence of Des Moines' steady, even and rapid growth that it must prove most satisfactory to all. There are in this Directory 24,936 names, an increase over last year of 5,437 names. The total number of names in this volume, 21,936, multiplied by 23/4, gives Des Moines a population of 68,574.

But our estimate is made on the most conservative basis—perhaps too conservative, for many publishers multiply the number of names by 3. On this basis Des Moines' population is **74,808.** Buffalo uses  $3\frac{1}{4}$  as a multiplier, Milwaukee 2.90, Brooklyn  $4\frac{1}{4}$ , St Louis 3, Minneapolis  $2\frac{1}{2}$ . The older cities of the East use a larger multiplier than young Western cities, upon the hypothesis that the names in other directories more generally represent heads of families.

Moines compares with other cities in the increase of the number of names, as revealed by the 1892 directory, we cite the following:

	į	:		No. of	In-	
Ci	y.		Year	Names '	crease	
Indian	poli	S	 _1892	52,008	2,960	
Scattle	L		  .1891	21,515	3,971	
Denver	L		 1890	54,548	$10,979^{\circ}$	
Omaha			 1891	17,067	1,400	
Milwai	ikee.		 1.1890	76,521	3,789	
Des Mo	nes		 1892	24.936	5,437	
"		1	•	1		

When it is remembered that Des Moines

methods—which she has never encouraged—and the transitory and fluctuating population incident thereto, the remarkable growth shown by this issue of the Directory must be all the more gratifying, for here it means a permanent and lasting accretion. We could cite some high pressure "boom" cities, the latest directories of which show a very large decrease in the number of names. The following table of population of Des Moines will show how steadily the city has grown, and that here there has been no period of retrogression—no col-

lapse of "booms":

In 1860\_\_\_\_\_\_

In 1870\_\_\_\_\_

In 1880\_\_\_\_ In 1890\_\_\_\_

That the city is developing and expanding in all her varied industries, and rapidly gaining on some of her ambitious rivals where 'high pressure' methods have prevailed, is shown beyond peradventure by the figures above given.

R. L. POLK & CO.

In 1850 the population was 1.502

### DES MOINES.

TEARS ago, before the white man had cast lbiging eyes upon the fertile valleys of what was destined to be the great Statelof Iowa, the Sac and Fox Indians held sway over the territory surrounding the present city of Des Moines. But the pressure of immigration begun to be felt long before the middle of the present century dawned, and on October 11, 1842, commissioners appointed by the United States Govern ment purchased from these Indian tribes the land in what is now the western portion of the State, the treaty occurring at Agency City, one of the expressed stipulations being that a military fort should be established at the junction of the Des Moines and Raccoon rivers On May 9. 1843, the little steamer Ione arrived, bearing a detachment of officers and soldiers, and a ford was soon erected and christened Fort Des Moines. This was the small acorn from which has grown the great city which today adorns and beautifies the valley of the two rivers which there unite and flow on together on their journey to the sea—a city of beautiful homes, numerous churches, schools and colleges; a city noted for its sterling and enterprising business men and lovely worden, and one of which every inhabitant is justly proud.

The first election in Pole County was held on the first Monday in April, 1846, he number of votes cast being as follows: Fort Des Moines, 70; Camp Creek, 42; Allen's Creek, 63, or a total of 175. July 15, 1846, in pursuance of an order by the County Board of Supervisors, there oc-

Moines. The Federal authorities established a postoffice the same year, the post-master carrying the mail around in his hat and dispensing it to his patrons as he met them "about town," and it is a matter of record that neither were his duties arduous nor his emoluments large. The first wedding occurred June 11, 1846, the first frame house was built in 1847, and the first court house was erected in 1848.

As early as 1850 the people of this city began to agitate the removal of the State Capital to Des Moines. After a long and hard fought battle, the State Legislature in 1854 passed a bill providing that the Capital should be located here two years later. February 3, 1856, by act of legislature, the town of Fort Des Moines was incorporated as a city with the shorter and more euphonious title of "Des Moines."

The first State House was built immediately south of the present one, the cost being \$65,000, and in those days it, was considered a pretty fine building. Now, standing in the midst of a sloping and beautiful park, soon to be dotted with fountains, trees and statues, arises in stately and imposing proportions a structure costing over \$3,000,000, and it is the boast of the State that was built without the creation of one penny of indebtedness, and without suspicion of jobbery or fraud. Upon a commanding elevation, reached by a gradual rise from the river, the Pride of Iowa," as it is affectionately termed, stands to-day an example and a proof of the wealth, wisdom and patriotwith its golden domes catching and reflecting back the sunlight, it lies upon the bosom of the city like a beautiful gem, and at night, when its myriad windows blaze with light, it seems a veritable Aladdin's palace.

#### Advantages of Location.

The city of Des Moines has a most advantageous geographical location. Lying in a beautiful valley at the junction of two rivers, with a gradual rise from the water's edge to the high and tree-crowned bluffs which surround the city on nearly all sides, it presents to the eye a view of varied and panoramic beauty. The Des Moines river, flowing from the northwest, sweeps around to the east, then bends shapely to the south until it strikes the Raccoon in the southeastern portion of the city. The latter river, coming in from the west, skirts the former southern boundaries, and after its junction with the Des Moines the blended streams flow toward the Mississippi and the Gulf. A rich farming country surrounds the city, giving guarantee of substantial and continued prosperity, and that there shall be no lack of bread for the busy thousands, each of whom is doing his part in the grand work of building up a city of which every resident is proud, and the fame of which has spread to every quarter of this broad land.

That Des Moines is destined at no distant day to be a great center of population and commerce is susceptible of easy proof. Its history in the past and the logic of its natural advantages and resources tend to show this.

#### Natural Resources.

While the growth in population of Des Moines can not fail to be a subject of gratulation to her citizens, the natural resources of the city and vicinity donstitute one of the leading reasons for that growth. Prominent among these, and a great factor in the upbuilding of a manufacturing and

commercial center, is the item of coal. This is found here in inexahustible quantity and of exceptional quality, and is furnished at a price so low, especially that used for manufacturing purposes, that no manufacturer seeking a location can fail to be favorably impressed with this point. Slack for firing poilers is sold at an average price of 50 cents per ton, delivered, and its heating power is almost as good as that of the best lump coal.

Clay of the best quality for the manafacture of brick is also found here, including the variety used in making the common brick of commerce white or "Milwaukee" brick clay, paving-brick clay, potter's clay, terra cotta clay, and an especially excellent kind of clay suitable for use in the finer branches of the art. In all, there are sixteen varieties to be found in this vicinity.

There are also valuable deposits of sand here, suitable for the manufacture of glass and artificial stone, and for use in building purposes.

The water power of the Des Moines River is good, and has been improved by the erection of a substantial dam north of the Walnut street bridge, being utilized in the production of electric power and light.

#### Business Resources.

The wholesale and retail business of Des Moines has grown into vast proportions within the past few years, and is a subject of so much variety and interest that it can not be properly treated in the limited space allotted to this sketch. However, a brief synopsis will give the reader a fair understanding of how it has increased, and of how the business of a city is carried on:

Financial—By reference to pages 56 and 57, it will be seen that Des Moines has thirteen banks and a clearing house, besides numerous loan and trust, savings and deposit, building and loan and other associations. These institutions are all solid and substantial, conservatively managed, and rate high in the commercial publications.

INSURANCE. The dity has a number of home insurance companies all equippe with abundant capital and doing a good business, some carrying assets running into the millions. Under the wise insurance laws of the state of Iowa, the holder of a policy in a home company is guaranteed full protection against loss, and this is one of the great secrets of the success which attends insurance companies organized within this state. Nearly all the prominent companies of other states and also foreign organizations have branch offices here and the volume of business transacted yearly by these different corporations is very large.

WHOLESALE AND RETAIL. Des Moines is building up a large wholesale trade, and owing to lits valuable location between Chicago and other large Western cities it is sure to increase from year to year until it becomes one of the most important items in the yearly balance-sheet. The retail business of the city has doubled and trebled within the last few years. Statistics are dry reading, but those bearing on the in crease of Des Moines' wholesale and retail business during the past ten years read al most like a romance. Suffice it to say tha no other Westernicity of equal flopulation has during that time increased its business at so rapid a rate and kept the increase.

REAL ESTATE.—The real estate marke of a city is not always a true index to it prosperity. Inflated prices sometimes give to a town or city a fictitious standing bu sooner or later the pendulum is sure to swing back, affairs resume their norma condition and a crash comes that leaves values and business below the real level As we have before said, Des Moines has never suffered the calamity of a 'boom' for a boom ' is a calamity of the worst sort. The growth of values in Des Moines real estate has been steady healthy and solid, and to-day, so great is the demand for property from those who wish to buy for business purposes and those who desire to make this city their permanent home that values are constantly rising. No safer investment need be sought than real estate in this city, and no larger returns on the money invested can be secured in any other legitimate direction.

SOLIDITY OF ITS BUSINESS FIRMS —It is a great matter of pride to the business men of this city that Des Moines has a very low percentage of business failures. This is largely due to the careful and conservative manner in which the different firms carry on their affairs, there being no wild scramble each to outdo the other nor to shine with a fictitious brilliancy which must sooner or later either be paid for one hundred cents on the dollar or else be avoided by the fraudulent failures which stain the fair name of so many other cities. The business men of Des Moines, as a class, are possessed of sound discretion, good judgment and unimpeachable integrity, and with the commerce of the city in such hands as these there can be no question as to the future prosperity of the city and its varied commercial interests. What is said of the business men is allike true of the citizens in general, and with such a people, filled with love of home, honesty of purpose, pride of their city and desire for its advancement, Des Moines is sure to go on to a bright and glorious future.

#### Public Conveniences.

STREET RAILWAY.—Des Moines has the finest street car system in the West. Propelled and lighted by electricity, the cars glide along/smoothly over solid roadbeds, making fast time and close connections. There are twelve separate lines or routes (See page 73), all of which converge at the transfer office, at 201 Fifth street, where a comfortable room is provided for those compelled to wait a few moments for cars. By a system of transfer slips, one is enabled to ride the entire distance from one end of the city to the other for a single fare of five cents. The system has over thirty-five miles of track, including switches, and

is thoroughly equipped in the way of rolling stock. A vast power house on the east bank of the Des Moines river furnishes all the current needed to send the cars flying over the various lines, and that the people of the city appreciate the system and its management is evidenced by the immense patronage it enjoys.

WATER WORKS. - Pure water is one of the greatest blessings that has been bestowed upon man, but it would be of but little use to him in a city, like this had not human skill and ingenuity devised a way of furnishing it in such shape that it shall be accessible in needed quantities. Des Moines, by reason of the two rivers that flow through its borders, is assured of an everfailing supply of water; the Des Moines Water Works Company, by its splendid and complete system of water works, renders it certain that the supply shall be furnished as needed, and further that the fire protection of the city shall be ample to meet any emergency that may arise.

RAILWAYS.—The railway facilities of Des Moines are unsurpassed by those of any other city in the Northwest, and are far superior to those of many places of greater The different lines, radiating population. in all directions, give ready egress and ingress to the various mercantile commodities, and are the spokes of a wheel of which Des Moines forms the hub. New lines are yearly seeking admission to the city, and as the roads already here bear every indication of prosperity and success it is safe to say that railroad building in the state of Iowa will not come to a standstill. One especial feature connected with this subject worthy of commendation is the Des Moines Union Railway, Company, composed of home men, which owns its own engines, tracks, right-of-way, etc., its business being to switch from one track to another the locomotives and cars of the various lines entering the city.

ELECTRIC AND GAS LIGHT PLANTS.—There are in this city one gas and three electric

light and power plants, thus assuring the citizens abundance of artificial light and power to propel the machinery in the various shops and factories. The streets in the business part of the city are lighted mainly by arc lights, with incandescent and gas lamps in the resident portions.

#### Principal Buildings.

Des Moines is graced by many stately business blocks and public buildings, erected in a solid and substantial manner, yet in such a way as to be pleasing to the eye. Prominent among these and now just approaching completion is the eight-story office building of the Equitable Life Assurance Society of New York, at the corner of Sixth avenue and Locust street. Near at hand, and almost directly across Sixth avenue, stands the Essex building, a sixstory structure, occupied by the Des Moines. branch of the Columbus Buggy Company. The Savery Hotel Building at the corner of Fourth and Locust streets, is an impressive-looking structure finished in pressed brick with stone trimmings. One block north of it stands the new Y. M. C. A. building, and the Des Moines Club House is one block west of the latter. On the corner of Fourth and Walnut streets stands the Kirkwood House block, and at the corner of Court avenue and Fifth street the Federal Postoffice building commands attention by its solidity and beauty of constructure. The Iowa Loan and Trust Company's building was among the first of the large office structures to be erected in Des Moines. Directly across the street from the latter building stands the handsome new office block of Conrad Youngerman, and north of it is the Clapp block, one of the earliest office buildings in the city. The Marquardt block at Fifth and Locust, the Good block at Fifth and Walnut, the Grand Opera House on Fourth street, Foster's Opera House at Eighth and Walnut, and the Goldstone Hotel on the East Side, are all deserving of more mention than our limited space will permit. A new block

now in process of erection is The Illiad, on the site of the old Exposition building at Eight and Walnut, which, when completed will be one of the handsomest and most convenient in the city. The new Harris Emery building, the Masonic Temple and a score of other structures should be described in detail, but if mention were made of all deserving of it, a good sized volume would be required to contain their descriptions.

### Churches, Schools and Col-

One great cause of pride to Des Moines people is the large number of churches, schools and colleges within her borders. By reference to pages 57, 58 and 59 it will be seen that no less than nineteen different denominations maintain an organization within the city, being divided into sixty-five congregations or societies. These bodies own a number of very fine church edifices, several being built entirely of stone and finished on the interior in a luxurious manner.

The public school system is one of the best in the State or West, there being thirty two school buildings in the city thoroughly equipped with trained and skillful principals and teachers and all the needed apparatus for carrying out the work of educating the rising generation Numerous as are the public schools they are supplemented by a university and several colleges, so that unless the student desires to study some unusually rare branch, he can obtain a most thorough and complete education within the boundaries of the city

#### Commercial Organizations.

One of the surest evidences that Des Moines has emerged from the chrysalls of village and town life into the perfect state of a great city is furnished by a glance at the different commercial organizations by means of which the business men keep in touch with the state of trade and have at command at all times a detailed knowledge

of the various resources; needs and oppor-tunities of the city. 'Organization' is the supreme watchword nowadays in every branch of trade and business, and that which has been demonstrated to be so beneficial to the components must necessarily be much more so to the whole upon this theory, and with a view to bringing into closer relation the business men of the city, a few enterprising spirits organized the Commercial Exchange in 1888. From a small body, held together at first by frail threads, the Exchange has grown into a powerful factor for good to the whole city. Not only are the complex problems of business discussed and ways and means devised to overcome the diffi culties that arise, but at their regular and most enjoyable lunghes, held in the sump tudus diningrooms of the leading hotels the broader and more domprehensive problems relating to public policy receive attention and are discussed | Another, and one of the most beneficial of the many objects of the Exchange, is the inducement of manufacturers to locate within the city Much good work has been done in this direction in the past, and as the Exchange is now stronger and more aggressive than ever before, it is fair to presume that their efforts in this line will continue to bear more and better fruit as the years go by.

Another organization of the same general character, but laid on somewhat different lines, is the Producets' Association While one of the objects of both organizations is to further the best interests of the city, the more particular object of the Producers' Association is to push the sale of Des Moines made products of every kind. This organization is yet young, dating only from 1890, but it has already shown itself a power for good in advertising to the world the varied products of the Capital City, and by its unique methods has done more in the last two years to advertise Des Moines of the trade than could have been accomplished in double the time by the usual slow-going methods.

The association is worthy of the fullest commmendation and support of every resident of the city, and its motto, "Was it made in Des Moines?" should be the shibboleth to lead on to a sweeping commercial and business triumph.

The real estate men have also organized an Exchange, and its numerous and alert membership take care that the realty interests of the city are kept well to the front. As stated on another page of this sketch, real estate in Des Moines is one of the best and safest investments that can be made, and every member of the Real Estate Exchange stands prepared to back up this assertion with facts and figures that cannot fail to convince the most skeptical. Empty houses are a rarity in Des Moines, and the purchase of lots and building of houses to let is one of the most profitable branches of business in the city.

#### The City Buildings.

The present City Hall has long been inadequate to accommodate properly the various officers charged with the administration of municipal affairs. Recognizing this fact, the City Council recently contracted for the erection of a new public building at the corner of Second street and Grand avenue, and before next winter's snow flies Des Moines will have a City Hall that will take rank with those of other cities of the first class. The old and weather-beaten structure which has so long indifferently sheltered the firemen and, their apparatus will disappear soon, as a new fire station is to be erected near the new City Hall. Its demolition, while i will be a relief, will yet remove a landmark with which every citizen of Des Moines is familiar.

#### A City of Homes!

In closing this hurried and imperfect sketch, we cannot refrain from speaking of one trait of the people of Des Moines that never fails to strike the stranger who tarries for a while within her gates, and that is the

love they bear for their city and their

homes. Love of home and country has been sung by the poets from time immemorial as one of the greatest virtues of a people, and if this was true in olden time, when the yoke of the tyrant kings and lords lay heavy upon the necks of their unwilling subjects, how much truer it must be in a land of liberty and among a free people! Meet a Des Moines man where you will, no matter how tempting may be his environment, his love for his home city is proof against all other charms, and he sturdily maintains its superiority to that of all others. Des Moines is indeed essentially a "City of Homes," and it is a title which it might well adopt and wear with highest pride. The broad, well-shaded streets and avenues, stately homes, well-kept lawns and cosy cottages that abound in all directions from the business center to the uttermost limits of the city, evidence the fact that the people of Des Moines are sober, industrious and home-loving, and that they constitute a class of ditizens of which any city might well be proud.

The Capital of Iowa is indeed a pleasant place. Favorably located as regards geographical position; its business interests in safe and conservative hands, backed by the support of a strong financial standing; with numerous schools and colleges dotting the city and furnishing ample opportunity for a thorough education; with churches sufficient to meet all the varied views upon the great questions involved in man's relation to the future; with civic and religious societies in large number, and with all the modern improvements that go to make life in a city desirable, the people of Des Moines are to be congratulated upon their happy situation and future prospects, and the publishers of this work, in presenting them with the first issue of their regular annual Directory, express the confident hope that they may see Des Moines grow into a great city, and they guarantee that as the years go by and the population increases, the Directory will keep pace in every particular with the growth of the

Queen City of the Northwest.

### INDEX TO ADVERTISEMENTS.

We wish to call particular attention to the following alphabetical list of Merchants and Manufacturers whose business notices appear in this work. It is only by their support that a first-class city directory is possible. We take great pleasure in recommending them to the patronage of our citizens. They never borrow from their neighbors, and show the true spirit of progress that builds up cities to the highest commercial prosperity.]

## STREET AND AVENUE GUIDE.

## EXPLANATION

In arranging the "Guide to Streets and Avenues" for the City of Des Moines the following plan has been adopted (and approved by the City Engineer). All streets on the west side of the Des Moines river have been designated by the name or number alone, abolishing the prefix of west, except in the case of numbered streets south of Vine; for example: Walnut, Vine, Grand avé, Locust. In the case of the numbered streets, all north of Vine are designated as 1st, 2d, 3d, 4th, etc., and south of Vine west side of and beyond the river are designated as e Vine, e Court ave, e Walnut, e Locust, etc. the numbered streets north of Vine as e 1st, e 2d, e 3d e 4th, etc., and south of Vine as e so 1st, e so 2d, e so 3d, etc. Streets on either side of the Des Moines river which do not run through from West to East Des Moines are designated by their names without any prefix; for example: Maple, Buchanan, School, University ave, etc. If located south of the Coon river, the name of the street is followed by (S Des Moines); if north of the Des Moines river, as (Highland Park). The following abbreviations are used: Ave for avenue al for alley, bet for between, n for north, so for south, w for west, e for east, nw for northwest, sw for southwest, junc for junction, opp for opposite. Following the description of each street or avenue, will be found the names of inter-

Following the description of each street of avenue, will be found the names of linter section in the order of their intersection.

The streets as located, follow in alphabetical order with the streets that intersect:

- East from e 21st to and beyond Wilbur, third north of Easton Boulevard.
- North from Crocker to School east of
- North and south from Fremont 2d west of e 9th
- Adams (South Park)—South from s s Indiancla ave., sixth southeast of 7th street bridge.

### GIVING AN DIRECTIONS FOR ALARM OF FIRE.

Key holders will be particular to observe the following rules:

To give an alarm, go to the nearest! boy, open the door, pull the hook to the bottom of the slot once and let go; then close the door.

Do not pull the hook if the fire bells or small bell in the box is striking, as that indicates that an alarm has already been; given.

Be particular to remain at the liox, until the arrival of an officer of the fire department, who will release the key, or if circumstances will not permit remaining,

then the proper officer will return the key to the holder as soon as convenient. Key holders; hipon changing their

locations, will please return key or leave word with chief of fire department, corner Second street and Grand avenuer

Cor. Fifth and Mulberry Streets.

Twenty Cents a Day is \$1,000 in Seven Years

AUTHORIZED CAPITAL.

\$50,000,000.00

THE UNION is practically a co-operative savings bank, organized strictly in accordance with the provisions of Chapter 6, Title IX, of the Code of Iowa, and its shares afford the best possible investment for surplus or savings. Three classes of stock, par value \$100 per share; \$1 per share membership fee.

GLASS A-Savings and Borrowers 58 cts per month.

CLASS B-Investors propaid; \$40 single paylement; no dues; no fines; will mature in six years or less at \$100.

CLASS C-Investors full paid; \$100 single payment; full dividends in cash in January and July of each year.

DRAWABLE ON NOTICE.

Every cent of profit earned by the Union is distributed twice a year among the shareholders, and

every dollar invested earns exactly the same rate of dividend, no matter what class of stock it represents, and the rate of profit to shareholders thus far has been from 15 to 17 per cent per year.

FORFETURES—You cannot forfeit any part of your interest in the Loan Fund.

EXTRA ASSESSMENTS.—There are none

SAFETY.—The Union loans to its shareholders on real estate security worth double the loan at the start, and every month reduces the face of the loan.

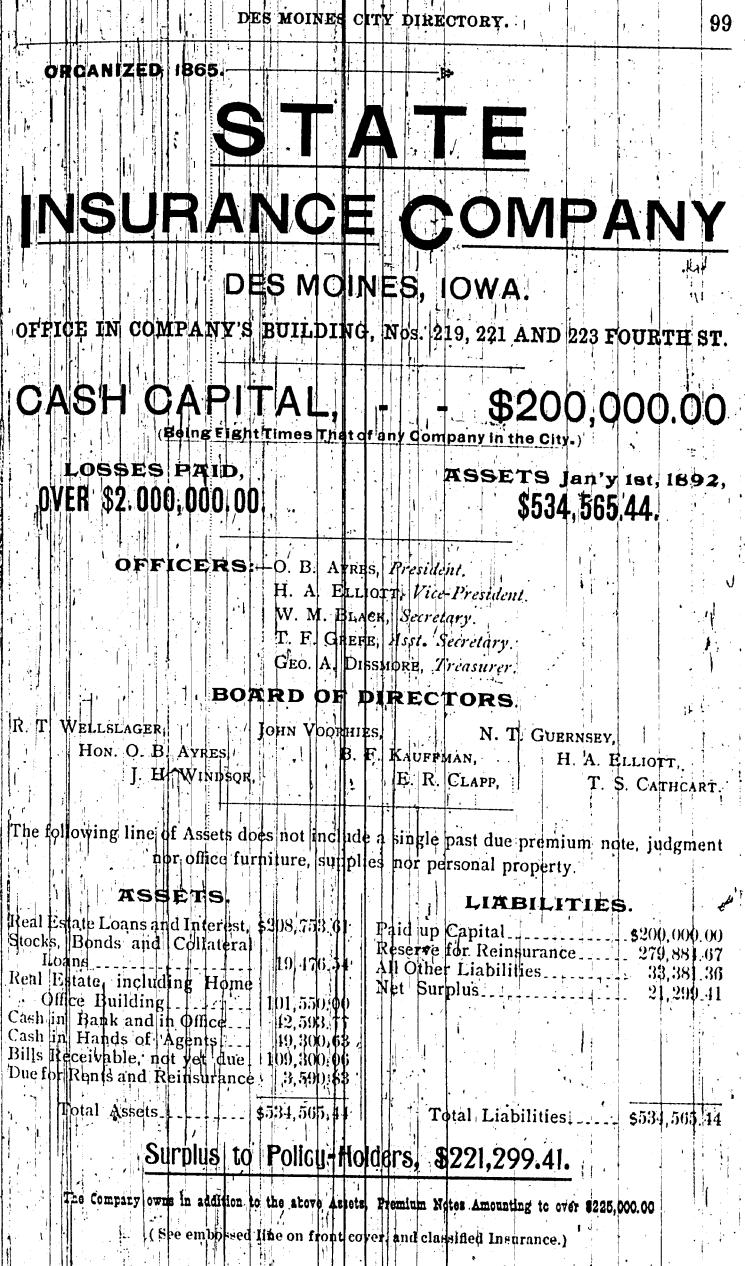

Safer than a sayings bank and four times as profitable.

As safe as a government bond and six times as profitable.

Interest compounded twelve times a year for the benefit of shareholders.

Sixty years of success guarantees the merit of the system in general.

### COLLEGE. OINES, IOWA.

The Largest and Best Equipped School in the State of Iowa Between 1,200 and 1,300 different students enrolled this year. A large Faculty of Excellent Teachers

where a person may find almost any branch he desires to study. Accommodations the Best. Expenses Low. Fall Term Opens August 30, 1892.

Highland Park Normal College is conceeded by all to be the largest and best generally equipped institution of learning in the State of Iowa. The success of the school is without precedent. It is a solid, substantial school organized and conducted on business principles, thoroughly equipped and embodying everything that is good in modern principles, thoroughly equipped and embodying everything that is good in modern principles and practices of eaching.

Accommodations. The school in the west. The College Building itself is provided with large, light, siry recitation rooms and they are models of neatness and taste. The halls for young men and the cottages for young lailes furnish such home accommodations for students as are not provided by any other school in the west. The rooms in the halls for young men are 2 by 15 with a closet 3 by 7. They are heated by steam, lighted by electricity and furnished with all the furniture needed for comfort and accommodation. The dottages for young ladies are modele of neatness in thick rarrangement. They are carrieted throughout, are liquided by hot air or steam, lighted by electricity, have buth rooms and city water. All of these accommodations for students are furnished at the same rates charged by most schools for very poor accommodations.

dations for students are furnished at the same raiss charged by most schools for very poor accommodations.

Rquipments. No school in the country is provided with better equipments than Highland Park Normal College. It has a fine Library of 4000 volumes. The fleeading-room is furnished with daily and weekly papers, magazines, ourmais everything that goes to make a Reading-room pleasant and desirable and useful. The students have free access to this. The Librarian is always in the book-room ready to help students. All the mats that are needed in any of the departments are at hand. The abparatus in the departments of Givil Engineering, Electrical Engineering, Pharmacy, Chemistry and for work in Anstony and Physiology is as complete as is needed for the most thorough study of the work. In fact it may be said that no school in the westlis more generally, equipped in all of its departments in fact it may be said that no school in the westlis more generally, equipped in all of its departments and Physical Culture. The Hackberry of Review Didactic, Special Didactic, Special Training, Scientific Classical, Literary, Civil Engineering, Electrical Engineering, Pharmacy, Business, Music, Electrical and Physical Culture, Art. Relegraphy, Shorthane, Cupe partiting, Pharmacy, Business, Music, Electrical and Physical Culture, Art. Relegraphy, Shorthane, Cupe partiting, Pharmacy, Business, Music, Electrical actemy, or \$50.00 for fall course. Pharmacy \$20.00 a term, about half what is usually charged. The regular work of the School, light 20 cents a week, heat 3dcents a week, Tuition in Telegraphy is \$25.00 atterm, or \$50.00 for fall course. Pharmacy \$20.00 a term, about half what is usually charged. The further of the school had an advance pays for board, room rent, fution heat and light for nor wear of 4 weeks.

## Gazetteer and Business Directory.

The Seventh Biennial Edition of this work is now in course of publication. It is the intention of the publishers to maintain the high standard for thoroughness and accuracy the GAZET-TEER already enjoys, and give to the public a work as nearly perfect in all its various details as a liberal expenditure of care and money can make it. Everything that pertains to the advancement and development of the resources of the State or that tends to give local importance to individual interests will be found embodied in its pages. We so licit the patronage of Merchants and Manufacturers engaged in the lows trade, and will at all times be pleased to see them and furnish all information in our power.

### R. L. POLK & CO.,

122 La Salle Street

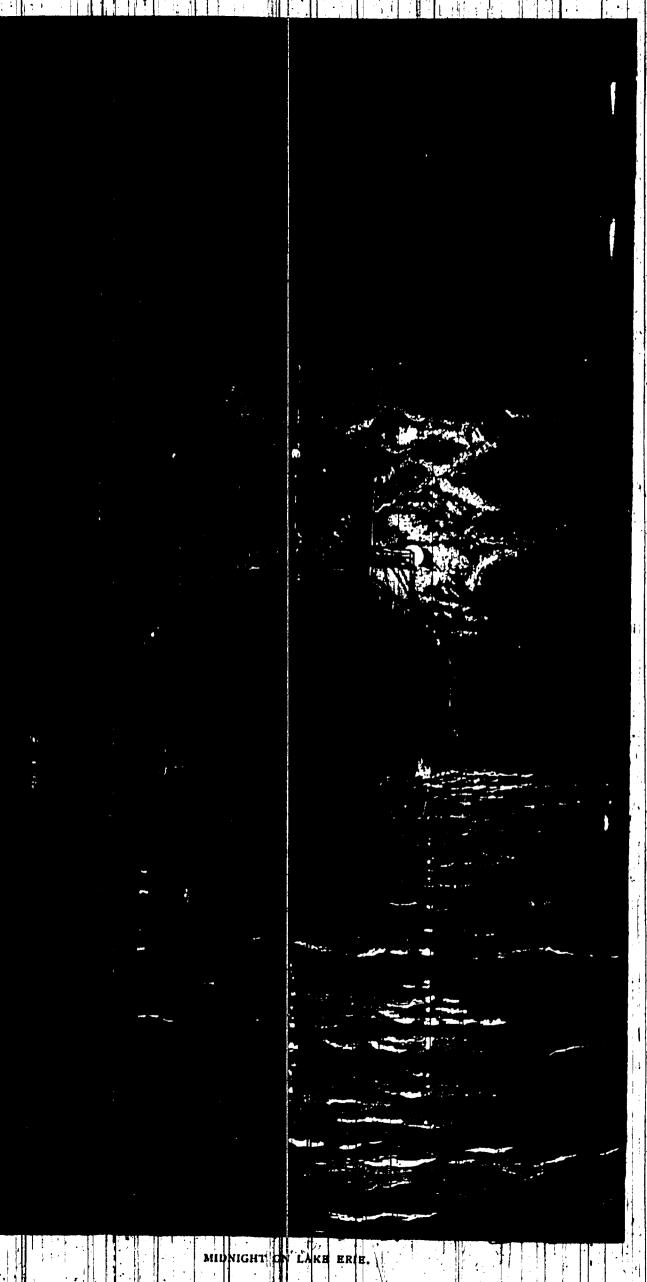

CHICAGO, ILLINOIS.

The story of Picturesque Mackinac has caused thousands of strangers to visit our Northern Lakes. Its ruthful pictures by both pen and pencil excite wonder and admiration. The original design, embracing both lustrative and typographical features, has recently been much improved, and the revised edition, now in press,

certainly prove the most powerful exponent of the Great Lakes ever published, while as a tourist guide it is, as it both interests and instructs. Address E. B. WHITCOMB, DETROIT, MICH.

five steamers, the largest, swiftest and most luxurious on fresh waters. The company builds none but steel vessels of the strongest pattern, thus securing, with the addition of sufficient watertight compartments, practical indestructibility.

While all the newest marine ideas of real merit are invariably made use of, the policy of the management is well defined in the uniformity of general design. The steamers are roomy side-wheelers, propelled by the

Clyde patterned feathering wheels, thereby developing a marvelous speed without the slightest jar or noise. Their forward and after saloons, of solid mahogany, are magnificently appointed and tastefully decorated, and their rooms and parlors replete with wire and hair mattresses. Pullman blankets, electric lights, etc. The lower saloons are devoted to dining halls, which entirely separate the culinary departments from the cuisine, which is equal to that of any first-class hotel, includes all the luxuries of the season, and the price charged barely meets the outlay. In fact, it may not be egotistical to say that the Detroit and Cleveland Steam Navigation Co. offers to persons of fastidious tastes the only solid satisfaction to be found in inland travel.

#### THE LAKE ERIE DIVISION.

ETWEEN Detroit and Cleveland may be called the main stem of the company's lines. Operated between two large cities, a sufficiently steady patronage is received to warrant the best of service, and to this end two mammoth sister ships have just been built. Their extraordinary size and grandeur has placed the route in the front rank of that comparatively small array of trunk lines to which travelers of experience look forward with pleasant anticipations. We may describe the new City of Detroit, the latest addition, as being 300 feet long by 72 feet wide and 16 feet molded depth, with hull divided into nine water-tight com partments. The boilers are four in number, and carry 110 lbs. of steam. The engine is a compound beam of 2700 horse-power. The grand saloon is of solid mahogany, and contains a double tier of state-rooms connected by a broad gallery. It is 240 feet in length, and its dome rises 20 feet overhead. There are over 140 state-rooms and parlors, each lighted by an electric lamp. The City of Cleveland is similar in every respect. A steamer leaves either city late in the evening and anrives at her destination long before breakfast, making connections with all arriving and departing trains, and forming by far the shortest and cheapest as well as the nost delightful route between many far distant cities. Steady travelers, usually confixed to the hot, dusty, noisy rail car, always avail themselves of the charming quiet, cool fresh air and luxury of a full night's rest afforded by this water route. The Sinday night Hips, from June to September, are very popular and have proved a g'eat convenience.

Passengers intending to continue their voyage on the steamers of the Lake Haron Division may so plan their departure from Cleveland as to make direct connections at Detroit, or have a day for sight-seeing. The Tuesday or Thursday

steamer from Cleveland finds the other almost ready to depart, while the Friday or Sunday steamer will necessitate a stay in Detroit till evening. In either case the Lake Huron steamer will be found at the Company's dock on the arrival of the Lake Erie steamer, and passengers may at once transfer to and take breakfast on the former, which they can make their home.

Passengers arriving in Detroit by rail or otherwise, on Tuesday and Thursday evenings, and intending to take the Lake Huron steamer the next morning, may at once proceed on board and occupy their state-rooms free of extra charge, thus becoming settled down and in a position to enjoy, as a spectator, the excit-

ing scenes incident to departure the next day.

#### THE LAKE HURON DIVISION

distance of 350 miles, mostly through Lake Huron. From Detroit to Port Huron, at the foot of the lake, the scenery is most charming, embracing the headwaters of the Detroit River, the placid Lake St. Clair the far-famed Government ship canal, the famous St. Clair Flats ishing and shooting ground and the majestic St. Clair River. From Port Huron, all suggestion of land disappears on the starboard bow, and only shows faintly on the port or American side. Occasionally, when the steamer approaches a way port, the passengers have time to gather some ideas of the characteristics and occupations of the inhabitants of this purely lumber region, but for the most part of the twenty-four hours spent on Lake Huron, they will experience the sensation of being in midlake.

Considerable interest attaches to many way ports because of their note as camping or resorting spots. At St. Clair or Port Huron clubs are constantly located from July to September, and at Oscoda, Alpena, Chebbygan and St. Ignace bodies of hardy men may frequently be seen embarking or debarking. Those leaving the steamer are making for some inland lake or stream; the others need naught but the trophies of their skill to tell of their whereabouts during the preceding two weeks. In fact, the whole of the country surrounding Mackinac offers endless attractions to the adventurous. Well-stocked rivers and lakes abound, and the interminable forest is still overrun with furred and feathered creatures.

After touching at Mackinac, the steamers cross to the freight terminus of the route at St. Ignace. This occupies from four to six hours, and those who wish to return at once can, without laying over, see considerable of the main points of interest at the famous National Park, if they engage one of the charioteers for a drive.

This delightful round trip of 920 miles from Cleveland or 700 miles from Detroit occupies 4½ days from the former of 2¾ days from the latter point. It costs but a trifle more than \$4.00 per day all told, and at that price is most emphatically within the reach of all. You cannot go anywhere and compass so much enjoyment and solid comfort by the way. A summer trip should be planned to get all the quiet and fresh

air possible. Such complete relief is only found by taking a water trip, where the scenery is varied and attractive, and there is ample time for a good look at every interesting object.

#### THE COST OF A ROUND TRIP

ANNOT be intelligently shown without some explanation. By the company's advanced system, meals and berths are not included in the price of a ticket, and patrons are at liberty to provide for themselves if they so desire. Berths are in rooms, and cost \$1.00 for the upper or \$1.50 for the lower, on each steamer, no matter if the trip be one or two nights. The whole room accommodates three persons and costs \$2.50. Meals cost 50 cents each and may be estimated by the time card. These expenses are invariable, except for children under five, when the meals are 25 cents. Our table of costs is not guaranteed, but the figures are more likely to fall below than rise above the estimate.

		FROM CLEVELAND.	FROM DETROIT.
Transportation		\$ 9.00	\$ 7.00
Medls			4.00
An upper berth for the trip,		4.∞0	2.00
Total with upper berth		\$18.00 2.00	\$13.00 1.00
Total with lower berth. Two persons in one room	, , , , , , , , , , , , , , , , , , , ,	\$20.00	\$14.00 27.00
Third person, add transportation and meals			11.00
Total cost, three persons in one room		\$52.00	\$38.00

Only the transportation is purchased in a through ticket. Meals and berths are arranged for exclusively by the company.

#### MACKINAC ISLAND.

The rockgirt, fairy isle, sitting like an emerald gem in the clear, pellucid wave, rises majestically from the crystal waters, which cover but cannot conceal the glistening, white pebbly depths beneath. It is the central point of the three great lakes. It knows no land breeze, hence the winds are always cool and refreshing; they never cease flowing. Its area is over two thousand acres, of which the national park and military reservation comprise about nine hundred. The natural scenery is unsurpassed. Nature seems to have exhausted herself in the manifold objects of interest which meet the eye in every direction. The lover of Mother Earth will hardly grow weary of wandering through its shaded glens, and climbing over its rugged rocks, each day bringing to light some new object of beauty and interest. Longfellow, in his poem of "Hiawatha," has put into English verse some of its wild Indian legends, which people every rock and glen with spectral habitants. If the poetic muses are ever to have a new Parnassus in America, they should certainly fix on Mackinac Island. Hygeia, too, should place her temple here, for it is one of the purest, dryest, dearest and most healthful of atmospheres.

Nothing can exceed the beauty of this island. It is a mass of calcareous rock, rising from the bed of Lake Huron, and reaching a height of more than three hundred feet above the water. Some of its cliffs shoot up perpendicularly, and tower in pinnacles like half ruined gothic steeples. The island shows unmistakable evidence of the water having once been two hundred and fifty feet above its present line. It is a mooted question whether the lake has fallen from its original level, or the island has been lifted up. It is cavernous in places, and in these the ancient Indians were wont to place their dead. Portions of the beach are level and well adapted for landings.

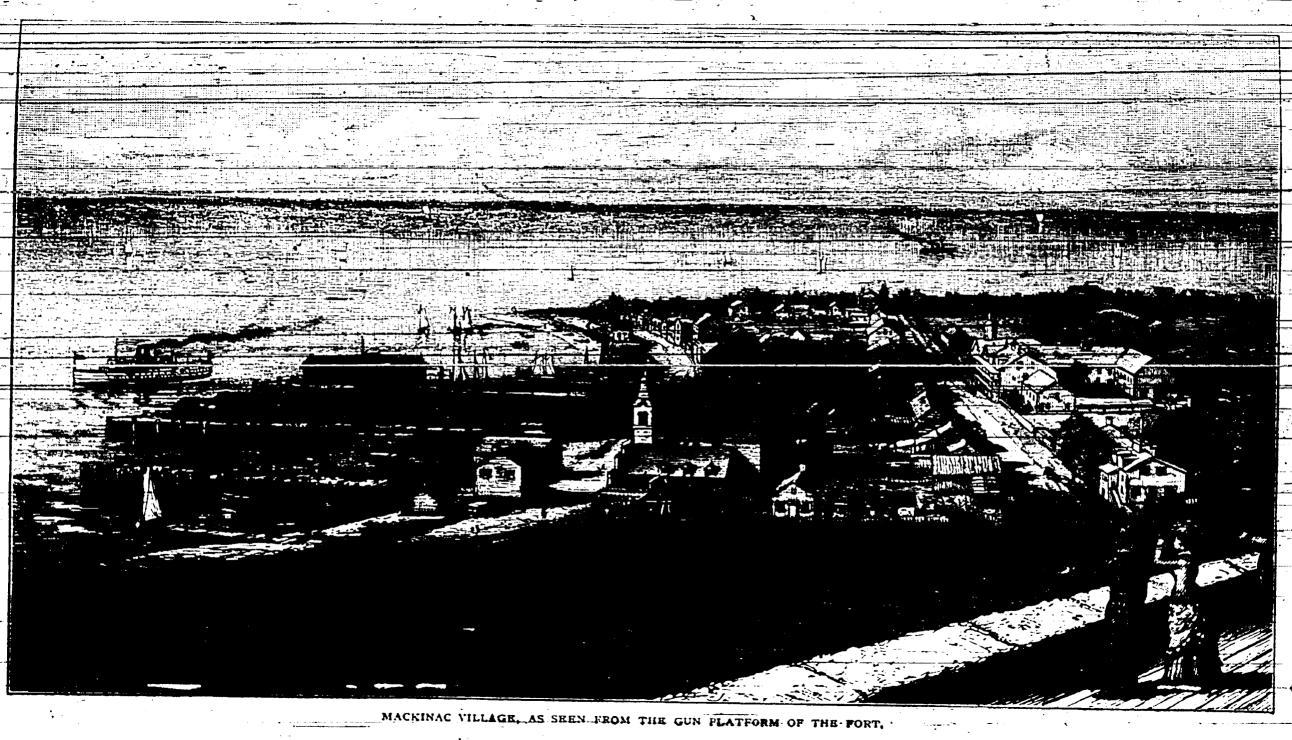

The harbor at the south end is a little gem. In it, vessels can anchor and be sure of a holding, and around it the little old-fashioned French town nestles in primitive style, while above frowns the fort, its white walls gleaming in the sun. This village is a perfect curiosity in itself. Situated at the foot of the bluff, its two streets extend for a distance of a mile along the beach. The buildings are a ridiculous mixture of the modern and antique. Some were brought from Old Mackinaw when the town

and fort were removed from that point after the massacre of June 4, 1763. Many of the fences are of the original palisade style. The whole area of the island is one labyrinth of curious glens and valleys. Old fields appear in spots which were formerly cultivated by Indians. In some of them are circles of gathered stones, as if the Druids themselves had dwelt there. The island was formerly covered with a dense growt's of rock maple, oak, iron wood, etc., and there are still parts of this ancient forest left, but all the southern limits exhibit a young growth. There are walks and wind a paths of the most romantic character among its hills and precipices. From the extinences overlooking the lake can be seen magnificent views of almost illimitable extent, and as the observer gazes from the rocky battlements of the fort upon the surrounding waters, there steals upon him a sense of security which seems a complete bulwurk against the host of Summer annoyances.

The late Dr. Drake says: "The island is the most important summer resort to which we can direct the attention of the infirm or the fashionable. As a health resort tis unsurpassed. Its cool, dry air and the living streams of pure water which gush from the lime rock precipices, are just what are needed to bring back the glow of health to the faded cheek, and send the warm currents of life dancing through the system, superseding all necessity for nauseating iron, sulphur and epsom salts,"

At watering places generally, all the features of the surrounding scenery are soon familiarized to the eye, which then merely wanders over the commingled throngs of coquettes, dandies, dancers and idlers, and soon returns to inspect the real or fancied infirmities of its possessor. A visit to Mackinac reverses all this. Its natural beauties and historic associations, together with the innumerable lesser attractions which cluster round about, serve to furnish visitors with so much entertainment and variety for either the robust or weakly ones, that ennui which eventually is felt at most resorts need not be experienced here. You eat with a new relish, and sleep like a child,

You row or ramble, scarcely able to keep your buoyancy within bounds. Dr. Mills, once post surgeon at Mackinac, says: "No better place can be found for sickly girls and puny boys, for worn-out men and women. From the hour of entering Lake Huron, your feelings will indicate that you have passed beyond the reign of miasma, fever, dyspepsia, blue devils and duns, and you look back upon the whole of them with gay indifference or a feeling of good-natured contempt as

with gay indifference, or a feeling of good-natured contempt, as every turn of the steamer's wheel carries you farther into the temperate and genial climate of the lakes, and away from your perplexities. Under these influences real diseases may abate, and the imaginary ones be forgotten, and this salutary mental excitement will not soon die away, for the historic associations, not less than the surrounding scenery, are well fitted to maintain it." Dr. Mann says: "A few whiffs of the air would make your lungs give a hygienic laugh. Children are crazy with animal spirits, and eat in such a way as to demonstrate the paradox that the quantity contained may be greater than the container." These extracts will no

Dr. Hammond, the famous physician, says: "I have no hesitation is saying that it is the best summer resort of which I have any knowledge, for persons whose nervous systems are run down, or who desire to be built up and strengthened."

#### HOTEL ACCOMMODATION

s a very satisfactory problem at Mackinac. There are innumerable hostelries of every grade of price and corresponding service. If the tourist wishes to study the ancient features of the island from their stronghold, he will put up at the John Jacob Astor House. This was originally the headquarters of the American Fur Company, and a glance at its low ceilings, scored by heavy timbers, its ancient fire-places, its clumsy iron door locks, and its old storing vaults will satisfy any lover of antiquities, even before he has been invited by the genial proprietor to inspect the account books of four score years ago. The Mission House, at the extreme easterly point of the island, is another relic of ye olden time. Commanding one of the best views on the island, it is very popular with those loving quiet repose.

The place of all places for the fashionable resorters is Plank's Grand Hotel, situated on a commanding eminence at the western end of the island, and facing the straits. This hotel is the largest summer resort in the West, accommodating as it. does upwards of 1,000 guests, and representing a capital of \$300,000. Its rates are from \$4.00 to \$5.00 per day, and the season extends from July 1st to September 20th This tremendous building is 650 feet in length and five stories in height. Its architecture is of the "Old Colonial" style, the distinctive feature being a colonnaded portico, 30 feet wide, upon which the windows of every floor open. The interior is well arranged and fully equal to every demand of the most fastidious taste. The lower floor is occupied exclusively by the dining-hall, drawing-room and private parlors, with the large rotunda office in the center. The dining-hall is a mammoth apartment, capable of seating 600 people. It occupies the space of two stories, the vaulted ceiling being 27 feet overhead. The guest rooms are large, light and airy. Each front suite is provided with a private balcony. The hotel is lighted by gas and electricity, heated by steam, and provided with elevator and electric call and fire alarm bells. It is also supplied with barber shop, bath-rooms, steam laundry and a first-class livery. A metropolitan orchestra is in constant attendance. The grounds have been made very attractive and a casino constructed for indoor sports. The hotel is under the management of Mr. J. O. Plank.

LL of Northern Michigan's many attractions are within easy reach of Mackinac Island. Indeed, so central is this spot, that the "Mackinac Region," as commonly spoken of, is supposed to inolude every attraction of the Great Lake Region of Upper Michigan, All methods of travel may be called into use, and all seem to start from a common center or hub, radiating as they do from this small sland. Perhaps the most important of these secondary points is the Little Traverse Bay. Here, clustering within a mile or two of each other, and with fast extending suburbs almost touching, are Petoskey, Bay View, Wequetonsing, Harbor Springs

and Harbor Point. The most expeditious route is via the G. R. & I. Railway, whose excellent train service renders communication possible at almost any hour of the day. The distance by this route is only thirty-five miles from Mackinac City, the nearest point to Mackinac, on the mainland. They may also be reached by either the day or night lines of steamers by way of Lake Michigan. By these lines the mileage is nearly doubled, and the better part of a day or night occupied in the journey. By far the prettiest route, however, is via the picturesque Inland Line of steamers through Mullet Lake and Indian

River The Michigan Central Railroad leading directly south, touches Topinabee and Indian River in an hour's ride from Mackinac. These points are also local to the Inland Route.

Charlevoix and Traverse City, on Grand Traverse Bay, are best reached by the steamers on Lake Michigan. They are about a days' ride from Mackinac.

A line of splendid steamers makes daily trips to Sault Ste Marie, leaving Mackinac about nine in the morning, and passing all of the supero scenery of the St. Mary's River by daylight. At the Soo, connections are made with the through steamships running to the north and south shores of Lake Superior and to the Canadian

ports situated on Georgian Bay.

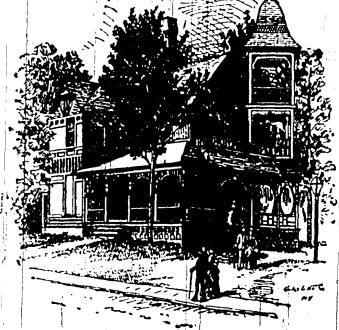

In a water trip to Chicago or Milwaukee, there is considerable diversity of choice. The Lake Michigan and Lake Superior Transportation Co.'s steamers running without stops straight through the center of the lake, afford a quick trip and the novelty of being in mid-sea for twenty-four hours. The Northern Michigan steamers, coasting to all important points on the Lake Michigan east shore, and consequently taking up more time, afford the tourist a better opportunity to view the industries of the region. Coming back to the service more directly connected with the island, we may mention that nothing gives a more general idea of its wonders than a trip around its shores in one of the numerous steam yachts. These trips are on at all hours of the day. So, also, are the fishing excursions to Les Cheneaux, than which no more delightful way of spending one day may be contrived. The ferry steamers, and the constant movement of steamers of regular routes, afford excellent opportunities to visit the mainland either north or south at any hour of the day or night.

PETOSKEY is a charming resort situated on the side of a high bluff near the head of Little Traverse Bay. The town numbers 3,500 souls, and has a water front

of 1½ miles, to which a long pier gives considerable character and life. A lofty limestone cliff flanks it on the west. Among its trees may be seen the tents of many "campers," and further on the pretentious villas of wealthy residents. From the verge of this cliff the view is superb. Five miles distant is the ridge of hills that lines the opposite shore of Little Tra-

verse Bay. These sweep in a symmetrical curve around this vast amphitheatre, and follow up the hither shore until they rise and terminate in high cliffs. The white line of pebbly beach which stands out so prominently against the green of the hills now takes an abrupt turn to the left, and forming a crescent two miles long, ends in a wooded point.

No summer resort or watering-place on the continent can boast of purer air, fresherbreezes or better hotels. Facilities for recreation are also good. Boating on the bay and short excursions by steamer or railroad may be indulged in at all times.

BAY VIEW COLLEGE.

Owing to the salubrious climate and central location, the Western Hay Fever Assocition makes its headquarters here

BAY VIEW, of Summer University fame, lies one mile further up the beach. Though but a few years have passed since the location of the grounds, this Assembly has become immensely popular in the East and South, ranking next to Chautauqua in size and completeness. The location is beautiful and no expense has been spared in improving its natural advantages. The land rises in natural terraces from the bay and affords cozy and picturesque sites for the four hundred cottages, of which glimpses may be caught through the trees. Clear cool water has been brought to these cottages through pipes from a never-failing spring further up the hill side.

HARBOR SPRINGS lies six miles further round the shore of Little Traverse Bay. It is located on a beautiful harbor (Wequetonsing) formed by the crescent of Harbor Point. Along the water's edge are large springs from which gush streams of water as clear as air and of a temperature only 12 to 15 degrees above freezing point. The history of the place is full of interest. Pieces of pottery show that it was once a stopping place for the ancient mound builders. It was for many years a central point for the payment of annuities, and for ages a favorite camp ground for the Indians. Many curious legends are extant. Strangers always visit the antiquated Catholic church, founded more than 200 years ago by Marquette.

THE HARBOR POINT RESORT, directly opposite, is singularly favored. The strip of rolling land on which it is situated is hardly more than a stone's throw in width, and while on the outer shore the heavy surf of Lake Michigan rolls grandly over a fine bathing beach, the children may with perfect safety paddle about the harbor within. Besides the large amusement hall and hotel which stands high above the beach on the breezy Lake Michigan side, the resort includes numerous cottages, which are provided for such of the guests as prefer the seclusion of their own roof.

CHARLEVOIX, 18 miles below Petoskey, on the Lake Michigan shore, is a most picturesque spot. The beautiful little town is situated at the mouth of a short strait, the outlet of Round and Pine Lakes. Further up, and just between the lakes, are the handsome grounds and residences of the Kalamazoo and Chicago Resorts, which occupy the north and south shores respectively.

THE INLAND ROUTE is undoubtedly the most interesting one between Mackinac and Petoskey. Nothing short of a water trip through the heart of Florida can compare to this wonderfully novel route by cropked rivers and lovely lakes, across the northern end of Michigan. Even with the former the comparison ends here, as the salubrious climate and the high forest grown shore are lacking. A little steamer leaves Mackinac at 7 o'clock, Cheboygan at 9 o'clock every morning, and after picking her way among logs and booms, past saw mills and through the lock, steams up the crooked Cheboygan to Mullet Lake. The lake is 12 miles long by 5 wide, with a charming ruggedness of outline, caused by the thickly wooded hills which completely encircle it and form its shores. Topinabee, a favorite spot for campers, is situated at the further end, and here the passengers debark for dinner. After a short rest the little vessel resumes her journey, and worries through Indian River into Burt Lake the lower end of which is crossed in reaching Crooked River. The latter stream is the shallowest and most crooked of the three, and although the steamer draws but thirty inches of water, it is only by a constant succession of twists and turns, scrapes and pushes and stops and backs that she gets through to Crooked Lake, where after a run of three miles, she ties up to the wharf at Oden, after an exciting and highly inleresting day. A dumny starts immediately on the eight-mile run to Petoskey, where it arrives in season for supper. The little steamers Romeo and Juliet, which compose this line, are marine marvels. A vessel capable of carrying 150 passengers, which may safely and constantly make the trip through mid-lake from Mackinac to Cheboygan yet at the same time is compact enough to wriggle through stretches of river that would seem impossible to crafts larger than a skiff, must be the handiwork of a genius. The twin screw system now in use on the most famous ocean flyers, has been employed in miniature to furnish the motive power. This enables the boat to turn in her ownslength, but even then, poles and ropes are in frequent demand, and the ingenuity and experience of the captain is taxed to the utmost.

MARQUETTE, the metropolis of Lake Superior country, is a very handsome city. Its business portion displays great activity and metropolitan tastes. Its residences, which are exceedingly beautiful, are placed high up on a bluff to the north, and command a view of the lake for 30 miles. While its central location makes it a capital base of operations for all the lovers of the rod and gun who visit these natural game preserves, it possesses no small attractions within itself. Speckled trout may be chught in the streams near by, while in the bay lake trout of twenty to thirty pounds in weight furnish exciting sport. The hotels are of the best, and everything necessary for hunting and fishing may easily be obtained.

Makinac Island follows the northern shore of Lake Huron as far as Detour, at the envance of the St. Mary's River, where the real interest begins. The river is 62 miles long, and is composed of a succession of beautiful straits and broad lakes. It is almost entirely shut in by high hills, which rise from the water's edge. In the many beauties and eccentricities of the stream and its outline, it is freely compared to the Hudson and other famous rivers. The channel is narrow, crooked and shallow, however, and must be passed by daylight. This is usually accomplished at dawn, this line being the only one which makes it at mid-day. The river is full of islands, and there are many popular hunting and fishing resorts along its course.

SAULT STE. MARIE, a city of 8,000 inhabitants, may be reached by rail or water. There is much of interest about the old place. It lies on the left bank of the river, just below the famous government ship canal, built for the purpose of passing the St. Mary's Rapids. The government works are exceedingly interesting. The immense and perfect structure of masonry, the water power which runs all the machinery necessary to operate the monster gates of the lock, and the dynamos which furnish the electric lighting, are perfect in all their details, and well display man's ingenuity.

STEAMERS RUN UNTIL DECEMBER 1.

# CALIFORNIA) \*\*\*

# ITS GREAT NATURAL WONDERS AND RESORTS.

In sounds superfluous and redundant to speak of pleasure resorts in California, and in any event they must be considered only in a relative sense. To a visitor from the Eastern States the whole of California is one great pleasure resort at all times of the year. Custom and the necessities of the language have compelled the use of the terms "summer" and "winter" in California; whereas, except upon the very crest of the Siera Nevada, there is no winter, and except in a few hot and and spots no summer; all else is spring—soft, gentle, and unfailing with flowers in constant bloom. The fact that there are many pleasure resorts in California, is the outgrowth of a local desire for change of scenery and climatic conditions for the benefit brought by rest and the pursuit of pleasure, and for the inedicinal effect of many mineral waters.

It is in the extraordinary variety of these resorts that their vitality lies. At the perfect on the perfect conditions for the pursuit of recreative pleasure, bathing on the seashore, hunting, fishing, and camping in the interior, or the long a resident, the time would arrive when he might desire a change from the charms of is particular environment. If a resident of an inland city, the coast would allure him summer; if he has settled in a coast town, the mountains will invite him to enjoy eight marvelous beauties. To the permanent pleasure of living anywhere in California added the close and ready means of enjoying other pleasures of a different kind; for a nother area of equal size may be found so many enticing resorts in such wonderful our through the country from Oregon to San Diego, giving but the briefest glance at the more popular resorts as they rapidly are passing in jeview.

#### THE SISKIYOU MOUNTAINS.

It is needless to describe the charming beauties of the Williamette, the Umpqua and the Rogue River valleys. We are not now looking for general beauties, which abound everywhere, but for fixed and popular resorts of pleasure seekers, we might spend weeks of incomparable delight hunting and fishing in the Siskiyo i Mountains; we might scale Mount Shasta and visit the many beautiful lakes of the Cascade and Siskiyou ranges. Soon after entering California the train stops at Ager; and thence we go by stage twenty miles to the Klamath Hot Springs, which lately have begun to attract hundreds of tourists. These remarkable springs of boiling mineral waters are situated in the valley of the Klamath, surrounded by all the glories of the northern mountains. A fine stone hotel affords comfortable entertainment for visitors; and in the vicinity are splendid hunting and fishing. If, as many tourists do, we should leave

the railroad at Sisson, in Strawberry Valley, and make the ascent of Mount Shasta, we should behold a scene of indescribable beauty and grandeur. Standing nearly fifteen

MOUNT SHASTA,

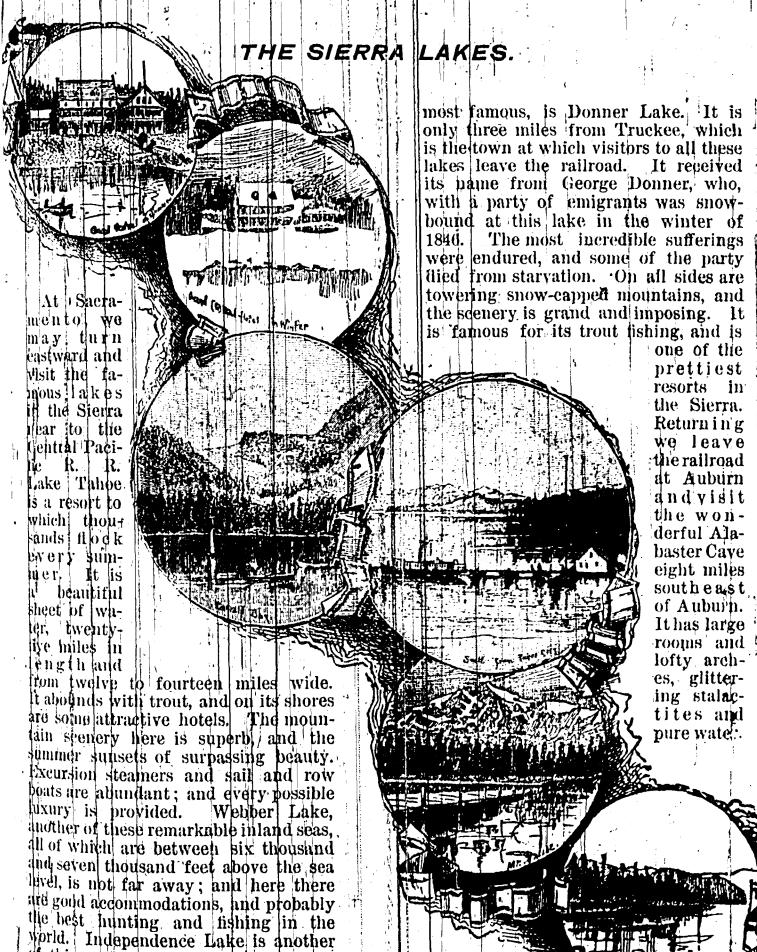

thousand feet above the level of the sea, we may see a wonderful country, covering a circle with a radius of hundreds of miles, and embracing many noted peaks, glistening lates, long ranges of snow-capped mountains, and the far-off lava beds of the Modoc country. Every mile of this mountain trip from Roseburg in Oregon to Redding in Cal fornia reveals extraordinary beauties unequaled by those of any other mountain gange in the world: for here, instead of bleakness and desolation, are seen pictures which have received the kindliest, noblest, grandest and most refreshing touches of Nature's prolific brush, from the delicate beauty of wild flowers to the snow-covered summit of Shasta. The Alpine Club of Portland has accomplished much in bringing to public notice the entrancing beauties of the mountain lakes, peaks and gorges of the Cascade and Siskiy u ranges.

The Strawberry Valley is the best point from which the McCloud River may be reached. This beautiful stream rises in the eastern flank of Mt. Shasta and flows southward, its waters finally reaching the Sacramento. It is on the McCloud River that probably the finest fishing and hunting in the West may be found. The river is, and likely will forever remain a wild and uninhabited stream. As a consequence there is nothing except hunting and fishing parties to drive out the game and destroy the fish.—an extremely difficult task. The scenery is beautiful, and Mr. Sisson of Sisson has established a camp on the river for the accommodation of visitors. For those who enjoy an outing of this character, the McCloud River is an earthly paradise.

The mountains of the North abound in so many charms that it is difficult to make a selection for enumeration. The town of Sisson itself is one of the most popular summer resorts in the mountains; and it is from this place that the grandest full-

fared view of Shasta may be had. The elevation of the town is 3555 feet; and the air is remarkably pure and lealthful. "Sisson's Tavern" is a charming hotel, where every comfort is furnished. Another place of great interest is the Soda Spring near Dunsmuir The line, pure, sparkling soda water has been brought in pipes from Shasta Soda Springs to a paydda alongside the railroad. The Sacramento River, here a noisy, turbulent stream, flows past; and on the opposite bank are the famous Mossbrae Falls. There, bold streams of water in great number and force burst from the rocks and rush down to the river in poisy cascades, scattering rainbow lewels with a lavish hand.

propping down from the mountains and following the Sacramento River from its source in a flank of Mt. Shasta to its mouth in the Bay of San Francisco, we pass some beautiful and romantic spots. Lassen's Peak overtops its giant companions in the Sierra to the cast; and at its base are a number of remarkable geysers, from which, with great roars, issue volumes of boiling water and mud, and where great pools of hot water abound all pointing to the volcanic history of the great butte.

d this group of wonders, with its attractive hotel and

another of these Sierra lakes, one of the smallest but the

its superb fishing and charming mountain sequery.

GEMS OF THE SIERRAS,

#### WONDERFUL SPRINGS.

ROM these lakes we may return through Sacramento, and, passing through Napa and Calistoga, visit the Napa Soda Springs, the White Sulphur Springs, the Geysers and Clear Lake. These popular resorts are near together; and their great beauty and close proximity to San Francisco cause them to be thronged with visitors every summer. At the Napa Soda Springs there are elegant buildings for the accomtation of visitors. The springs are situated in a valley surrounded by lofty verdure-

modation of visitors. The springs are situated in a valley surrounded by lofty verdure-clad mountains, which lack the bold and rugged aspect of the Sierra. At the feet of the mountains lie the splendid orchards and vineyards which have made the Napa Valley famous. It would be difficult to find anywhere else in the world so excellent health-giving waters set in the midst of scenery so beautiful. These springs are also a winter resort of great prominence, and are one of the objective points in the itinerary of Ramond

and Whitcomb's winter excursions of Eastern people to California.

The White Sulphur Springs, on the

The White Sulphur Springs, on the same line of travel, near St. Helena, still retain all the popularity which in early days made them the principal resort for the fashionable people of San Francisco. This is one of the most delightful resorts in the State; and the new management,

THE GEYSERS

which has recently taken charge, may be depended upon to furnish the best accommodations. The natural attractions are unusually strong. Etna Springs, sixteen miles from St. Helena by stage, are also very popular. Here

are futural hot and cold waters for bathing and drinking purposes. The Calistoga Springs, at the town of Calistoga, shows the general characteristics of the Soda Springs of Na 2a county, and possess rare healing virtues. Perched high in the mountains above Calis oga are the Harbin Springs. There are springs here of varying temperatures, one show in 118 degrees. There are many other hot and cold springs in this vicinity, including 2 lam's Spring, five miles from Glenbrook; Siegler Springs two miles from Admiss Bona za Springs, two miles from Siegler; Howard Springs, fourteen in number, two miles from Siegler, and 2220 feet above the level of the sea; Anderson Springs, ten miles from the Great Geysers; Pearson Springs, fourteen miles from Lakeport; Witter Springs, one mile east of Pearson; Hot Borate Springs, near Lakeport; Highland Springs, four miles from Kelseyville, famous for their douche bath; Cook's Springs, in India i Valley, Colusa county, vielding hot supplier and other mineral waters; Hough's Spring, in Lake county, thirty-two miles from Williams; Allen Springs, in Lake county, twen'y-eight miles by stage from Sites, on the Colusa and Lake Railroad; Bartlett Springs, in Lake county, thirty-one miles by stage from Sites, and one of the most popu'r resorts in the State. The easier accessibility of Bartlett Springs within the last few years has served to increase the number, already large, of visitors who annually seek health and pleasure there. The water is cold (though heated for bathing

purposes), contains soda, borax and iron, is heavily charged with carbonic acid gas, is cathartic, diuretic and alterative, and has a pleasant taste. A good hotel, a large number of cottages and excellent management assure the comforts of visitors.

ber of cottages and excellent management assure the comforts of visitors.

The center of this remarkable region of volcanic springs is found in the canon of the Little Puton River, far up in the mountains in Sanoma county, 1700 feet above the level of the sea, and distant one hundred miles from San Francisco. The railroad which passes Napa termidates at Calistoga, and thence a stage line runs to the Geysers, the most remarkable boiling springs of the world apart from those in the Yellowstone Park and Iceland. The trip to the Geysers, both by rail and stage, presents a series of panoramic views of unparalleled splendor. Apart from Yosemite and the Hotel del Monte, in their way the two noblest attractions in California, the Geysers exercise a peculiar and absorbing fascination. In the Little Pluton canon, embowered in a sylvan scene of singular beauty and repose, with the added massiveness of rounded mountain tops on either hand, there are one hundred springs of all sizes issuing from the fiercely hot interior of the earth. Surely the distance here from the surface of the earth to those terrific internal fires which formerly found vent in the great volcano now called Mt. Shasta cannot be great. This twe-inspiring phenomenon is now all that is left in activity of the violent volcanic disturbances which in the ages gone lifted California from the bottom of the Pacific. The waters range in character from that which is pure and cold to boiling caldrons of a black, thick liquid. There are cold soda springs and boiling alum and sulphur springs. Heavy deposits of sulphur, salts, ammonia, tartaric acid, magnesia, etc. cover the ground in places. There are intermittent boiling springs, from which jets of water and volumes of roaring steam issue at short intervals. The "Steamboat Geyser" is the most impressive of all, with its great body of steam thrown up under tremendous pressure, and with a heavy roar. There are not and cold medicated baths, where remarkable cures have been effected. From innumerable fissures in the ground come jets of steam. The "Witches' Caldron" is over seven feet in diameter, and its

depth has never been sounded. The fourth leading place of esort in his part of the State is Clear Lake, about thirty-five miles north of Calistoga. The scenery which surrounds this beautiful sheet of water, compared with that of Lake Talioe and its neighbors, presents all the striking differences between the Coast Range and the Sierra. At Clear Lake we find, instead of granite, snow covered earth-giants arranged in wild and majestic disorder, finely rounded mountains and hills decked with verdure and innumerable shady ravines and enticing nooks. The shore is singularly beautiful and gives an impression of infinite repose. lake is between twenty-five and thirty miles in length, from ten to twelve miles in width, and thirteen hundred feet above the sea. Many pretty Islands dot its surface, and charm-. ing towns line its shores. Among the lutter are Lakeport, the county seat of Lake county, a town of great beauty. The big hountain Konockti bathes its feet in the waters. The Sulphur Banks, at the lower end of Clear Lake, and easily accessible from Lower Lake, afford one of the most interesting spectacles to be found in the State. Through a mass of porous earth hot sulphurous vapors continually force their way, depositing beautiful but fragil sulphur crystals on the surface. This curiosity is well worthy of a visit. This account of the wonders of Lake county will close with a mention of the Blue

Lakes, three in number, two thousand five hundred feet above the sea, twelve miles from Lakeport. There is much suggedness of scenery, alternating with quiet wood pictures of exceeding beauty.

#### AROUND SAN FRANCISCO.

AN FRANCISCO iself is a superb winter resort for residents of the Eastern cities; but as it has a fixed population of three hundred and fifty thousand, it unfortunately, under the common interpretation of the term "resort," cannot be so classed. Evidence, however, of the great charm of its climate in winter is found in the fact that during those months which in the East are appropriately called "winter," San Francisco is always crowded with visitors. Apart from the strong and generally unique character of its attractions as a city,—such as its wonderful system of cable roads, its lofty hills, whose slopes and summits are lined with attractive homes, the close neighborhood of the two charming cities, Oakland and Alameda, and the near popular resorts, Sausalito and San Rafael, its beautiful land-locked harbor, its splendid park, with flowers in bloom throughout the year,—it has such attraction as an almost unbroken succession of bright days, a fine bracing air, a complete exemption from epidemic and

VICINITY OF CLIFF HOUSE.

endemic diseases, and an energetic, virile population, whose zestful pursuit of pleasure is a natural consequence of its prosperity and health. The superb hotels and theatres of San Francisco are a marvel to the world; and within a radius of a few miles from its borders are many of the most noted health and fashion resorts on the continent. One of the chief attractions in

the immediate neighborhood of San Francisco is Mount Diablo, a noble peak which rises from the Coast Range, east of San Francisco, and about thirty miles distant in an air line. A delightful trip is to leave San Francisco in the morning, quit the railroad at Martinez, take a team for the mountain, make the ascent (an easily accomplished task, as the road runs to the summit), and return to the city in the evening. The view from the summit is indescribably beautiful. San Francisco, Oakland, Alameda, and dozens of other towns and cities, nestle closely on the ground far below; and San Jose is visible in the distance. Far to the north and west are seen the snow-crowned summits of the Sierra, with grand old Shasta overtopping them all. Directly east of Mt, Diablo are the Byron Springs, noted for the medicinal virtues of their hot and cold sulphur, soda, iron and magnesia springs. They have also a natural hot mud bath, which has cured many a sufferer from rheumatic and other afflictions. Commodious bath-houses and good hotel accommodations are provided; and they are open the year round. We leave the Southern Pacific train at Byron station, some distance beyond Martinez, and take the stage thence two miles to the springs.

The Coast Division of the Southern Pacific Company is peculiarly favored, as it is the highway to some famous pleasure resorts. It runs south from San Francisco to San Luis Obispo county, with short branches to Santa Cruz, the Hotel del Monte,

Monterey. Pacific Grove and other resorts. Just south of San Francisco it passes through a number of beautiful towns that are particularly noted for being the country homer of San Francisco millionaires, including San Mateo, Belmont and Menloe Park. Through the forests of oak we catch a glimpse of the Stanford Junior University; and there are many vineyards and orchards. Fifty miles from San Francisco is the charming city of San José, with its superb hotel and its numerous places of resort near by, including the Alum Rock Sulphur Springs and baths, in a pretty canon, seven miles from San José. The road to the springs is finely macadamized, and is the fishionable drive of the city. It is at San José that we leave the railroad to visit the Lick Observatory, on Mt. Hamilton, twenty-six miles away. Hundreds of people throng to the Observatory every Saturday, on which day visitors are permitted to look through the greatest telescope in the world; and the use of the various instruments is explained by the courtedus astronomers.

## THE SANTA CRUZ MOUNTAINS.

In the Santa Cruz Mountains we find some remarkably enticing scenery. It is the famel "Shasta Route" on a small scale, licking the superb grandeur of that scenery but giving in its place some of the daintiest expressions of beauty that nature ever vields to her eager worshipers. The San Lorenzo River, shaded by great redwood trees winds along, now peacefully, and then in thrbulent disorder; and near it are the Big Trees. The more famous groves of the sequence gigantea are those of Calaveras and Mariposa; and next to these come the Big Trees of the Santa Cruz Mountains. The spot, in which they stand is surpassingly be utiful. One of these giants is slown, in the hollow trunk of which lived a large family in early days. Fremont's cabin is near. These are favorite pichic grounds; and the train always stops here for a considerable length of time. Throughout the whole of this mountain trip there are romantic spots which invite to rest. Beautiful streams of the purest water abound; and the waters are favorite resorts for the most expert fishermen of the State. Thousands of those whom an active city life has prepared to enjoy the luxuries which these mountains afford flock hither every summer, and bundreds of tents dot the mountain slopes and shady ravines. In these mountains is the world's greatest quicksilver mine, at New Almaden, easily reached by rail.

#### THE BAY OF MONTEREY.

HE watering places on the Bay of Monterey annually have an enormous aggregate attendance of pleasure-seekers. The shore is sheltered from the high summer winds and fogs which occasionally invade other parts of the Pacific Coast; and the climate of both winter and summer is indescribably delicious. The absence of harmful frosts renders possible a luxuriance of outdoor flower-

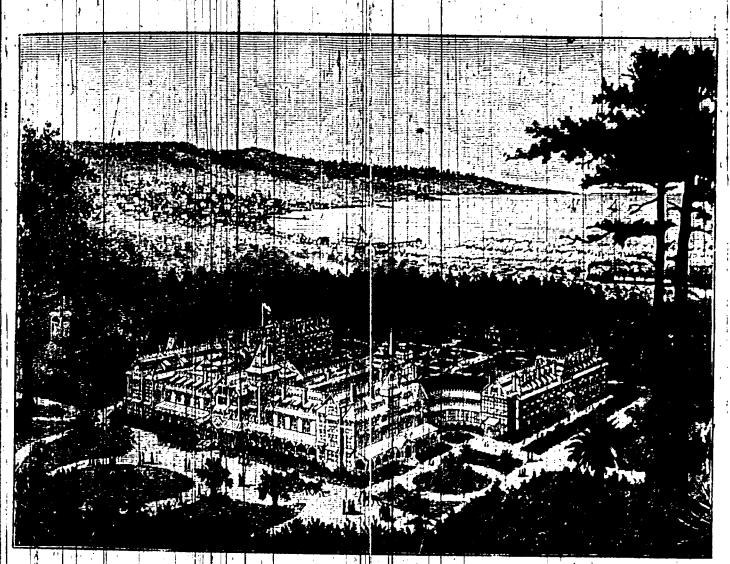

bloom unequaled in any other country in the world.

\* A branch of the Coast Division leaves the main line at Gilroy, and upon arriving at Pajaro, divides, one branch running along the northern side of the bay to Santa Cruz, and the other skirting the southern arm, passing the Hotel del Monte, Monterey and Pacific Grove. Santa Cruz is a beautiful city, with a long sand beach, and during the summer is crowded with a population drawn largely from San Francisco and the This is true also of Seabright, Capitola, Soquel, Aptos interior cities of the State. and other favorite summer resorts on the northern arm of the bay. Another way of reaching Santa Cruz is by the Santa Cruz Division of the Southern Pacific Company. It is advisable for us to visit the Hotel del Monte by way of the Coast Division, then follow the contour of the bay around to Santa Cruz, and return to San Francisco over the Santa Cruz Division. This gives one of the most charming, picturesque and varied rides of about two hundred and fifty miles that may be found in the entire On the line of the Coast Division we pass through a level country filled with orchards, vineyards and grain-fields, while on either hand is a range of mountains in the distance. On the Santa Cruz Division the scene is changed. Cruz the road plunges at once into the heart of the Santa Cruz Mountains, and after traversing them for thirty-five miles, winding through gorges and gulches, and here and there following the tortuous course of a beautiful mountain stream, it emerges into the Santa Clara Valley out Los Gatos. Near this place, at Saratoga, are the Pacific Congress Springs, situated in one of the most charming canons in California. There are a delightful hotel and other accommodations. The railroad runs northward from Los Gatos through pretty villages and miles of superb orchards and vineyards, passes through San José and Santa Clara, runs by the immense insane asylum at Agnews, strikes the Bay of San Francisco at Alviso, and skirts that wonderful sheet of water on the eastern side, passing through several delightful towns, and tormiof water on the eastern side, passing through several delightful towns, and terminating at Alameda, on the eastern side of the bay, opposite San Francisco. Alameda there are famous baths which San Franciscans liberally patronize; and the city is exceedingly attractive. Large ferry-boats transport passengers across the bay to San Francisco; and to a visiting stranger this is one of the most delightful sections of the tour.

## THE HOTEL DEL MONTE.

HE southern end of the Bay of Monterey has an attraction of more than natural beauty - the Hotel del Monte, known everywhere as the "Queen of American Watering Places." It is on the railroad and a mile from the charming old town of Monterey. The hotel is a splendid structure of modern Gothic design and is situated in the most striking and hand-some forest on the continent. This grove is composed of gigantic liveoaks and towering pines, and as the trees of both species are unusually large and present the more striking peculiarities of their kind on the most stupendous scale, they present a picture of unique effectiveness. The contrast between the oaks, sprawl ing, low and wide-spreading, and the pines interspersed among them, two or three times as tall, and straight and symmetrical, is exceedingly striking. In the heart of this great natural park is a flower-garden of one hundred and twenty-six acres. Apart from the vast expenditure of labor and money made on this garden, the natural conditions for floriculture which exist here are not equaled elsewhere in the civilized world. These causes make this garden the finest exhibition of skill and beauty in floriculture that exist; for nothing in Europe, where the culture of flowers is carried to so high an art, can approach it in design, management and splendor of color effect. In the Grounds there are the Laguna del Rey, whose glittering waters cover fifteen acres of ground, and from the center of which rises a fine thin fountain, and upon whose surface boating is a pleasant pastime; a curious maze; numerous tennis grounds, paved with ashphaltum; alluring walks and drives without a particle of dust or hud; and numerous swings, settees, and a hundred other things.; The hotel itself is a noble structure. It has broad verandas and contains five hundred rooms. The furnishings throughout are the finest that could be procured, and were manufactured especially for this hotel. In summer this

States and Mexico, who wish to escape their hot summers; but in winter it is filled with visitors who come to escape the fearful weather of the Eastern States and Lask in the splendid sunshine of Monterey. It might be inferred from this incomplete description that the charges at the Hotel del Monte are proportioned to the magnificence of the entertainment provided. Such, however, is not the case. On the contrary, so much higher are the charges at the fashionable watering places of the Southern States that one may visit the Hotel del Monte from the East and save money despite the far greater distance traveled.

THE HOTEL DEL MONTE.

The hotel is protected from the Pacific vinds, not only by its embowering forest, but also by a high tree-grown ridge of sand intervening between it and the ocean. On the ocean side of this ridge is one of the finest sand-beaches in the world. It stretches for miles from Monterey around the bay toward its northern arm, and this beach is a famous resort for surf bathers. For those, however, who prefer luxurious ease to the wilder sport of a plunge into the surf, there has been provided the great bathing pavilion of the Hotel del Monte. It is on the beach, a short distance from the hotel, and is one of the finest bathing establishments in the world. Four large swiftming tanks, filled daily with sea water, brought to different fixed temperatures, constitute the central idea, but there are also luxurious baths of various kinds in private rooms.

#### MONTEREY AND ITS VICINITY.

on the North of th

Pacific Grove, three miles beyond Monterey, is a famous resort, particularly in sum-

mer. . It nestles cosily in a great pine grove, is built on ground which rises gently from the bay to the summit of the peninsula, and is the ideal restingplace for those who, caring nothing for the greater elegance of the Hotel del Monte, want to dream away a month of delicious repose. Bathing, mossgathering, and strolling along the rocky shore are favorite pas-- El Cartimes. melo, the modest sister of the Hotel

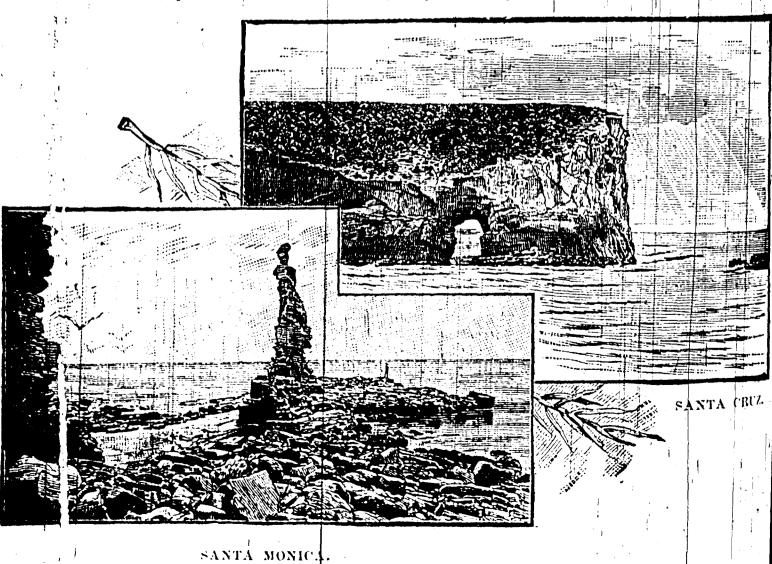

SCENES AT MONTEREY.

ventions, such as the Chautauqua Assembly and others. A superb assembly hall is provided for this purpose.

One of the most interesting of the attractions hereabout is the famous Eighteenmile Drive, a splendid macadamized highway, starting from the Hotel del Monte,

del Monte, has an open door and delightful entertainment—or cottages may be had.

People of the more cultured sort, apart from those who pursue the lighter forms of fashionable pleasure, come hither by thousands; it is the resting-place of artists, teachers, musicians, literary people, and brain-workers in general. As a consequence there are held here during the summer a large number of important con-

passing through Monterey, crossing over the neck of the peninsula to Carmel Bay (passing the famous old Carmel Mission, not far away), and thence skirting the entire peninsula, passing, on the way, the curious, gnarled cypress trees, which are peculiar to this little corner of the world; some charming leaches, which yield marvelous mosses and pebbles; the seal rock, upon which thousands of seals scramble and bark; the great reservoir, which supplies Pacific Grove and the Hotel del Monte with water; Fremont's old fort, and then Monterey again.

While in this part of the State we may visit the Cilroy Hot Springs, reached by stage from Glroy. This is a famous resort for invalids and pleasure-seekers. The hot mineral waters possess exceptional healing powers, and are useful both for drinking and bathing. The springs are beautifully situated in the Coast Range; and the hunting and fishing thereabout are an irresistible temptation to those who enjoy that kind of sport. The Madrone Mineral Springs, six miles north of the Gilroy Hot Springs, are also very popular. The Tassajara Springs, in Monterey county, are largely visited. Game and fish

abound in all of this country bordering on the Bay of Monterey.

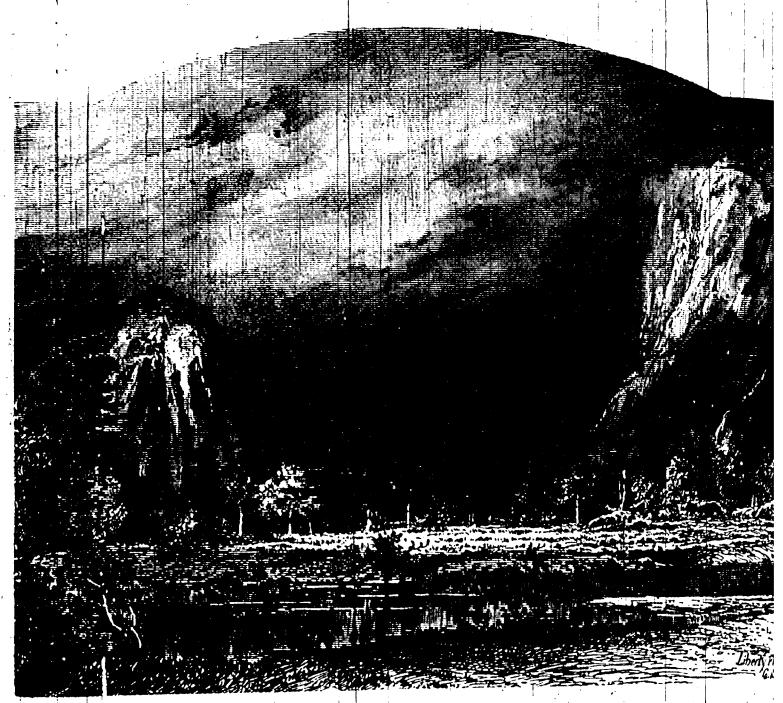

SANTA YSABEL

The Coast Division of the Southern Pacific continues its course southeastwardly liftenigh Monterey county, and terminates in San Luis Obispo county, traversing the rich, broad valley of the Salihas River. We shall find rare beauties all the way; but our first objective point is the Paraiso Springs, seven miles by stage from Soledad. These yield holes and sulphur waters, and are very popular. Hursuing the journey on the Coast Division, we arrive at the Paso de Robles Hot and Cold Sulphur Springs, in the northern extremity of San Luis Obispo county. Thousaids of remarkable cures have been effected by the use of the waters which these noble springs yield. Not far from Paso Robles are the curious Santa Ysabel Springs, which lately have come into prominence. They yield sulphur water. In pre-historic times this must have been a great health resort, as the runs of ancient dams are visible. Within the last few years the place has been improved with gardens and drives, and by the construction of an artificial lake of the warm spring water, where the visitor can indulge in a most energy times swim.

#### YOSEMITE AND THE BIG TREES.

Valley; and no real visit to the State can be made without seeing this marvelous creation. As no other natural wonder in the world has been so often and ably described as this, we shall do hardly more than mention it. To reach it, we cross the bay from San Francisco to Oakland, and there take the Southern Pacific Company; train by way of Martinez and Lathrop. Here we enter the great San Joaquin Valley, the southern end of the vast interior basin, of which the Sacramento Valley is the northern end. On the right, toward the west, lies the Coast Range, low and dark, and on the east, the towering Sierra Nevadas, whose giant peaks are forever covered with

THE TOSEMITE VALLEY.

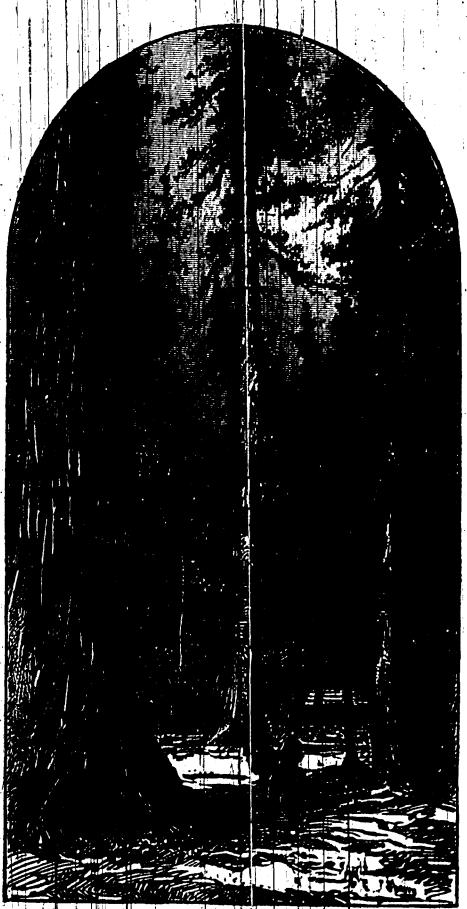

snow. It is into the heart of these snow-clad summits (though below the line of perpetual snow) that we must penetrate to find the Yosemite Valley. We leave the main line at Berenda, one hundred and seventy-eight miles from San Francisco, and take a branch railroad, called the Yosemite Division, which runs eastwardly into the Sierra foothills to Raymond, twenty-one miles from Berenda. Here we take the stage for the Mariposa Big Trees and Yosemite. The ride is superb; for as the road, with thousands of turnings and twistings, rapidly climbs the Sierra, it brings into view a series of scenic wonders and beauties which only these extraordinary mountains disclose.

The Mariposa Grove of Big Trees is on the way to Yosemite; and the visitor to the valley cannot afford to let these monarchs of the forest pass. The Rey. T. De Witt Talmage says of them: "Who that has seen them can think of them without having his blood tingle? Trees are now standing there that were old when Christ lived. These monarchs of foliage reigned before Clesar or Alexander; and the next thousand years will not shatter their scepter. They are the masts of the continent; their canvas spreads on the winds, while the old ship bears on its way through the ages. Their size, of which

travelers speak, does not affect me so much as their longevity. Though so old now, the branches of some of their will crackle in the last conflagration of the planet,"

We find ourselves at last on Inspiration Point, gazing down upon the incredible wonders of the Yosemite Valley, a long, irregular chasm in the heart of the mountains. Stupendous walls of granite in grotesque and suggestive forms inclose the valley; and far lown a beautiful sparkling river winds gracefully through the floor of the valley. The snows of the Sierral slowly melting, collect into rivers, and these plunge head-

long into the valley over the towering ledge of the grapite wall. "Ihat valley of the Yosemite," sa y s Dr. Talmage, is eight miles long, a half mile wide and three thousand [feet deep. Itseenis as if it had t h e b e e n meaning.of ()mnipotence to crowd into as small a space as possible some df the most stilpendous scenery of th world. #### OTHER SIERRA WONDERS.

HER wonders abound in the Sierra. The Hetch-Hetchy Valley, on the Tudiumner River, sixfeen miles in an air-line from Yosemite, is almost as marvelous as its better known sister. Its general character is the same, but it is smaller. Towering domes, stupendous cliffs, and lofty waterfalls exist here as at Yosemite; and we shall be well repaid for a visit to this enchanted spot. It is hardly so easy of access as Yosomite, and is not so much visited; but for all that it is one of the wonders The Calaveras Grove of Big Trees likewise demands our attention. It is reacled by stage from Milton, which connects with San Francisco by rail. While in the vicinity, we may pay a visit to the Wonderful Mammoth Cave of Calaveras; fourteen distant from the Big Trees, or seven miles from Murphy's. The Crystal Palace Cave which has a hotel at its mouth, is not far from here. It is southeast of Murphy's, just across the Stanisalus River, and five miles north of Columbia, a stage station ? natural bridges in this vicinity, one of them a remarkable formation, deserve a visit. come aratively little known scenic marvel of the Sierra is the King's River canon. We may hire horses and reach it from either Fresno or Visalia. Here the scenery is wilder. grander, and more picturesque than at Yosemite; but the valley, though very big, is little more than a gorge, the scenery lacks the finer finishing touches of Yosemite, and won terful waterfalls are absent. The towering needles, domes, and cliffs of granite pierce the 'ky thousands of feet above the floor of the valley, conveying an impression of the wile est and fiercest desolation. The finest fishing in this part of the State is found here; and hose who are hardy enough to tempt fate in the form of a grizzly, may find abundant opp runity. The Kern River canon, farther south, but also opening into the great interir basin of the State, is probably equally as wonderful as the King's River canon, but con paratively little known.

#### BEAUTIES OF THE SOUTH.

VERYBODY has read of Southern California; and little can be said of interest in addition to the volumes which have been devoted to descriptions of these incomparable charms. Since Santa Barbara has been made accessible by rail, we may make it a flying visit. Hard and unresponsive indeed must be the nature which fails to be touched and quickened by the infinite charms and graces of this favored sp.t. The climate is a perpetual spring; and tropical fruits ripen throughout the year. Tile city rises from a pleasant beach to the slopes of the Santa Ynez Mountains, and faces the south. The shore line runs east and west; the mountains shelter the town from the trade-winds. There are superb hotels here, including the Arlington, San Marcos, Commercial, and others. To the north lower of the castellated crags of Santa Ynez, to the east and west stretch long vistas of beach and valleys, and to the south is the grand old ocean, with the beautiful islands of San Miguel, Santa Rosa, Santa Cruz, and Anacapa rising from its depths. Four miles from Santa Barbara is the charming resort, Montecito,

LONG BEACH.

with its springs. Back of Santa Barbara is the Ojai Valley, noted for its health-giving elimate, and also for the Ojai Valley Springs at Nordhoff. This is a fine health resort. Upon going to Los Angeles we find ourselves in the center of a deligatful country. The city itself is beautiful; but a knowledge of its charms is common property. It is one of the most popular places of resort in California for Eastern people. Back of it rise the San Gabriel Mountains, from whose western slope roll thousands of acres of orchards, vineyards, and orange groves toward the sea. At the base of these mountains sits the beautiful town of Pasadena, which has more wealth and refinement in proportion to its population than can be found elsewhere in the State. On the slope is the famous Sierra Madre Villa, a charming and popular resort, with a fine hotel; and near Pasadena is the superb Hotel Raymond. On the coast, elgitteen miles from Los Angeles, situated on hotel, and surf-bathing all the year round. A railroal running directly south from Los Angeles brings us to Long Beach, on the coast, —a popular resort for literary and other cultured classes, and the meeting place of the Chautauqua and other societies.

In San Bernardino county we may leave the Southern Pacific at Colton and make a short run to Riverside, the fame of whose oranges is known all over the world. A charming country is this, and one which, as travelers, we cannot afford to miss. The

delights of San Diego, with its splendid climate, and of the Hotel del Coronado, that splendid structure with noble grounds on the Goronado Beach, are well known to all of us. A desire to see the strange and peculiar beauties of Falm Valley tempts us to follow the Southern Pacific into San Diego county. Heaving the road at Seven Palms, we find new by a singular gorge in the San Jacinto Mountains. The tall granite mountains lise abruptly on either hand; and the floor of the valley, for miles into the mountains, is covered with native palms of a height ranging from seventy-five to a hundred feet. A rich tropical undergrowth completes the picture. There are hundreds of these stately palms; and annually they are loaded with palatable fruit of the date variety. In the midst of this valley is a large hot inneral spring inclosed in a natural basin one hundred and fifty feet in diameter. The water is pushed up in a great column; and wonderful cures for

feet in diameter. The water is pushed up in a great column; and wonderful cures for rheumatism, sciatica and kindred afflictions have been effected by bathing in this pool.

After leaving Seven Palms we travel a few miles southeastwardly on the railroad and then encounter the singular experience of dropping below the level of the sea. Indio is twenty feet below, and a short distance beyond we touch the lowest point, two hundred and sixty feet below, at Fink's. This is an arid country, there being no natural vegetations but strong water is artificially applied there divides to be no limit to the focundity tion; but where water is artificially applied, there appears to be no limit to the fecundity of the soil. Indio is rapidly coming into notice as a place where astonishing cures have been made by the dry, pure air. For those suffering with pulmonary affections this undoubtedly is an earthly paradise. Returning we must stop at Colton and visit a celebrated resort, the Arrow Head Springs, near San Bernardino, which are annually visited by thousand of booth coltons. by thousands of health-seekers.

Unless we be controlled by a desire to visit the more fashionable and popular resorts, where the highest and finest luxuries of our civilization are provided at a reasonable charge, we may find with little trouble quaint, charming, out of the way places without number, where gentle Nature paints her pictures and sings her songs forever. Wonders abound some hair a house the control of the same hair a constitute abound. Some have a home and must be sought others abide everywhere, and constitute the life and essence of almost universal health, happiness, and prosperity. Not to see California and its wonders; not to constitute a part of it; not to de a child of this

infinitely gentle mother; not to be here and enjoy these bounties and blessings, to the end of securing greater prosperity and happiness,—is to be denied a priceless privilege; for in the possession of these natural charms California stands wholly alone in the world. Nature flings open our doors, and with an alluring smile invites us to leave our houses and go to the woods, the mountains, the fields, the seashore showing in all her moods of fretfulness or repose that though her duties are as boundless as the universe, her heart and home are in California.

#### HOW TO REACH CALIFORNIA.

EOPLE of delicate health, invalids, convalescents, tourists, and pleasure-seekers residing in northern latitudes often turn their thoughts, fancies, and desires to balmier and more congenial climes. This naturally induces the query, "Where and how shall we go?" The question is easily answered—to California. The beauties and boundless natural resources of California, the "Cornucopia State," have been graphically memorialized in verse and prose by our eminent poets and authors. Its rapidly growing popularity as a spaitarium and tourist resort is a convincing evidence that the beneficial and climatic influences of the Pacific Coast are becoming universally conceded. Having discovered the desired haven of health rest, and pleasure, the important question of transportation presents itself. deciding upon a route via which to travel to the Pacific Coast, one should be selected which possesses the advantages and comforts which tourists so much desire. The "Sunset Route" of the Southern Pacific Company affords to the traveler incompar able climate, balmy atmosphere, beautiful, historic, and romantic scenery, and every modern convenience, comfort, and luxury. This great line reaches from New Orleans to San Francisco.

The "Central Route," or as it is more commonly called, "The Pioneer Line," reaches California by way of Salt Lake City and Orden, Utah, and passes through the Grand Sierra Nevada Mountains. The "Shasta Route," or "Great Scenic Line," of the Pacific Coast, reaches California by way of Portland.

In selecting either of the above-named routes, tourists and pleasure-seekers may be assured of courteous attention, and every facility to make the trip pleasant and enjoyable.

## EIMPROVEMENT THE ORDER OF THE AGE.

Embodies the most Progressive Mechanical Principles; Pleases the Critical Business and Professional Man.

### SMITH PREMIER **TYPEWRITER**

Has Created Surprise at the facility with which we can clean all the type in 10 seconds without soiling the fingers.

Interest in the many manifestly superior devices by which all the essential fea-

tures of a writing machine are greatly perfected.

Delight in the beautiful work produced; the unique touch; the locking mechanism at the end of the line; the duplex movement of the ribbon; the changeable carriage; the many great conveniences, and the superb workmanship of this most modern of typewriters. Send for catalogue or call at our office.

## FACTS

ABOUT

## White Bronze.

It is cast from a refined non-corrosive Metal.

It is not Porous; has no fissures and will not absorb moisture.

It will not grow moss nor require Cleaning.

Frost has no effect upon it.

Inscriptions are cast in raised letters, and will always remain legible.

More artistic designs can be produced than in other materials.

No monumental material has ever received such unqualified scientific endorsements.

## Western White Bronze Co.
